“ As a former patient for many years, I will always remember Dr. Grove's unique laugh and his generosity. In 1974, I was a student UT-Knoxville and developed a problem with a wisdom tooth. At the time, Dr. Grove did not hold office hours on Saturday, but he kindly agreed to meet me at his office that weekend, as I had been suffering with pain despite popping aspirin for almost a week. He took one look at my mouth, uttered "Oh, boy!" and took X-rays. Turns out not only was the wisdom tooth impacted, it was also infected. Very messy. He shot the area with a peroxide solution and laid out my options. Normally in the case of an infection, the prescribed procedure was to treat and eliminate it before taking any other action. But, he cautioned, the way the tooth was growing, my particular situation would likely get a lot worse before it ever got better. My choice was to treat the infection and continue to suffer, or pull the tooth and risk spreading the infection and getting a dry socket. Not being able to imagine anything worse than what I'd endured during the previous week, I unhesitatingly said, "Pull it." He did, with some difficulty and requiring a little cutting away as I recall, gave me antibiotics, and sent me on my way. I suffered no swelling, no dry socket, no further spread of the infection. As wisdom teeth stories go, mine began with a bang ended with a whimper--all due to Dr. Grove's skill and considerate care.
